

# NPL Training Large Volume Metrology

## A coordinated approach to measurement training

In response to industrial demand, The National Physical Laboratory has developed best practice training in the underpinning principles and methods of large volume metrology.

### We aim to deliver:

- Certified Large Volume Metrologists
- A questioning and planning culture in staff
- A strategic approach to LVM applications
- Appropriate behaviours and attitudes

### Leading to:

- A reduction in scrap and re-work
- An increase in throughput and accuracy
- Skilled, motivated and responsible staff
