

# Control Panels & Assemblies

ASL provides a prototyping and medium volume manufacturing service to a variety of market sectors including: Nuclear, Utilities, Transport and Communications. We work with consulting and design engineers to manufacture bespoke solutions.

We specialise in supplying equipment that operates reliably under rigorous environmental conditions. Our service includes the assembly of:

- **Nuclear Monitoring Systems**
- **Industrial Control Panels**
- **Automotive Panels**
- **Utility Services Control Panels**
- **Construction Control Panels**

We work closely with our customers at all stages of the manufacturing process, offering a flexible service ensuring that their requirements are met reliably and cost effectively.
